

# Metronomo

Enabling scaling of quantum computers

Reference clock

Internal OCXO, frequency stability  $\pm 0.5$  ppb  
External: 1 MHz – 750 MHz

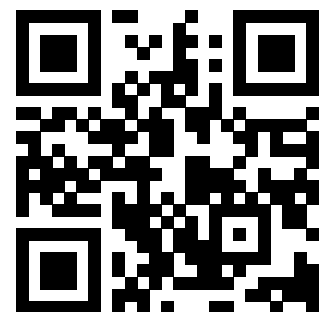

7 clock outputs

Up to 3 GHz  
Phase noise -125 dBc/Hz at 1 GHz carrier 10 kHz offset

7 SYSREF outputs to synchronize

Presto units  
other metronomo units  
other JESD204B-compatible devices

Configurable via LAN

More about Metronomo
